Technology-driven Quality with Higher Accuracy

Good-performance chips and upgraded algorithm make measurement results more accurate.

Intelligent Inflation Technology

Intelligent inflation technology is used to avoid discomfort caused by the sudden change of pressure and ensures a comfortable measurement.

Backlit Display

More clear vision and friendly for all users.

High blood pressure

$SYS \geq 160\text{mmHg}$

It is recommended to consult your doctor.

Mild high blood pressure or hypertension

$140\text{mmHg} \leq SYS \leq 159\text{mmHg}$

Normal

$SYS \leq 139\text{mmHg}$

Voice Broadcast

Voice broadcast during the whole measurement process.

Suitable for the seniors and people with poor vision. The voice function can be turned off if you don't need it.

Your blood pressure is
Systolic pressure 106 mmHg,
Diastolic pressure 65 mmHg.

Your pulse is 84 bpm.

Easy to Use with One-button Operation

Just press “

Measurement	Value	Unit
Systolic Blood Pressure (SYS)	106	mmHg
Diastolic Blood Pressure (DIA)	65	mmHg
Pulse Rate (PULSE)	84	/min
Time	5:02	-

Irregular Heartbeat Indicator

The BP machine can measure your blood pressure as well as your heart rate and would send you an alarm signal while your heartbeat is irregular.

Dual User Mode

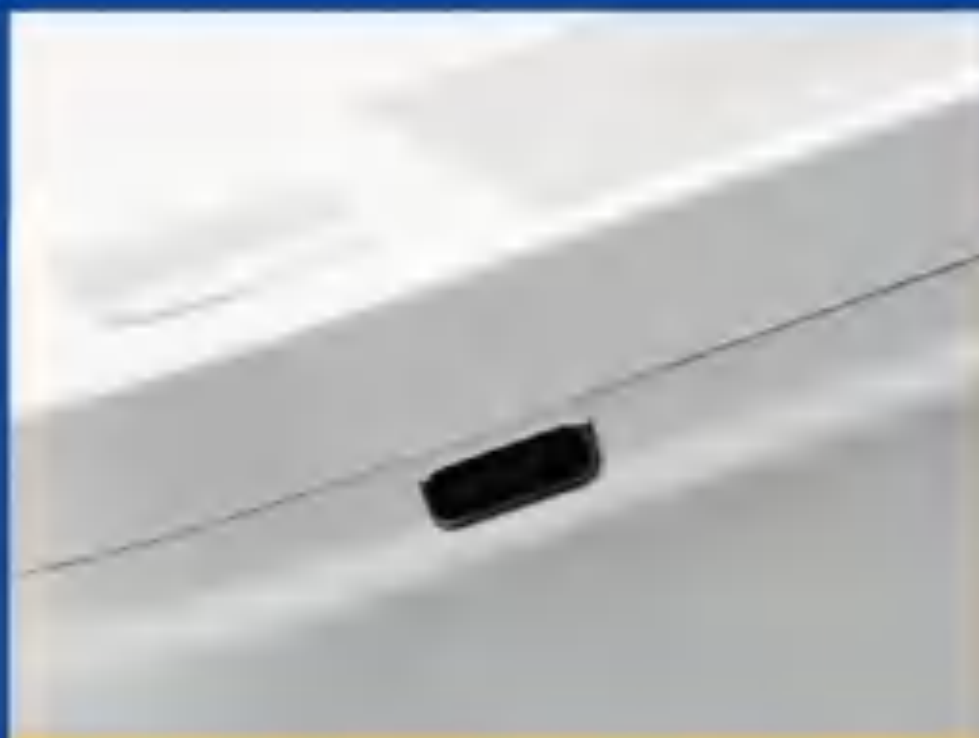

2X99 Sets of Memories

The BP monitor can store 99 readings for each user and each reading comes with date and time stamp for easy checking.

Dual Charging Mode

Dual power supply: Type-C and dry battery, more convenient and portable

Type-C Charging Port

4xAAA (DC6V)

More Details in Performance and Design

Low-noise design for a better experience

Adjustable and Long Cuff

The cuff fits most adult upper arms. Soft nylon fabric and velcro strip ensure a more comfortable measurement.

Energy-efficient: Auto-powers off in 60 seconds

Shock-reduction foot pads to avoid machine sliding
